### **Technology Specialisations**

Bespak is a world leader in the innovative design, development and manufacture of specialty delivery devices. With over 40 years' experience working with major pharmaceutical and healthcare companies, Bespak's track record in valve development and volume device manufacture is unrivalled. Compliant with ISO 9001 and ISO 13485, Bespak precision manufactures over 450 million complex devices every year within state-of-the-art cleanroom facilities. The company assists partners in achieving compliance for cGMP, FDA and MCA regulations.

Bespak's product range encompasses metered dose inhalers, actuators, nasal devices, disposable face masks, breathing circuits, laryngeal tubes and device enhancements such as dose counters and regime assurance devices. The company offers manufacturing services from concept design through to contract manufacture. Bespak partners pharmaceutical and healthcare companies that seek a drug delivery expert who can be employed at any stage from valve design through to contract manufacture.
